Card Design Decide from Admin

1:-Create Card and Number Selection – Select the number of cards to create/display (1, 2, 3, 4, etc.). Top , Burton Middle banner selection Option

Banner
small card
Big card
services

Need Automatic Change Option

2:-Video Upload – Upload MP4/MOV videos, preview, replace, or delete.

3:-Image Upload – Upload JPG/PNG/WebP images, preview, crop, replace, or delete.

4:- Content Writing – Add title, heading, description, button text, and optional link/CTA.

Select Card Count → Choose Content Type (Image / Video / Text) → Add Content → Preview → Save/Publish.

Service Card Targeting

Location Selection: State → District → PIN Code. Admin can select one state, multiple states, specific districts, or individual/multiple PIN codes.

Card Content: Each service card can have Card Number/Position, Service Name, Title, Description, Image Upload, Video Upload, Button/CTA, Redirect Link, and Active/Inactive status.

Display Logic: When a user opens the app/website, detect or ask for their location/PIN code → match **State + District + PIN Code** → show only the service cards configured for that area.

Example: **Service: Home Doctor Visit** → **State: Karnataka** → **District: Bengaluru Urban** → **PIN: 560066** → **Card Position: 1** → **Image/Video + Content** → **Show to eligible users.**

Device Binding & Referral Income Rules

Rule	System Logic
1 User = 1 Primary Device	Bind account with a unique device identifier after registration/login
1 Device = 1 Referral Benefit	A device can generate referral income only once
Multiple accounts on same device	Allowed only as per business policy, but no additional referral reward
Reinstall App	Must not reset referral eligibility
Logout/Login	Must not create another referral benefit
Different Mobile Number	Same bound device remains ineligible for another first-time referral reward
Referral Code	Referral code can be applied only during first eligible registration
Self-Referral	Block same user/device from referring itself
Duplicate Device Detection	Flag account/device for review
Referral Income	Credit only after required qualifying event
Reward Status	Pending → Qualified → Approved → Credited / Rejected
